01. ABOUT US

Since 1996, with its expert team, it has been providing healthy and high-quality services to its customers. Another crucial aspect, as important as the quality of materials, is the quality of application. To achieve the best results in applications, it is essential to make good use of time and pay attention to detail in the work schedule.

The most important element for our company is Customer Satisfaction.

MISSION

As a follower of innovations in our industry, our biggest goal is not to compromise on our quality, to offer permanent new products as soon as possible and to create customer satisfaction.

VISION

By adopting the principles of reliability and quality, we prioritize customer satisfaction and needs. We aim to remain a sought-after brand in our industry with our own truths and to be a growing company with our innovative spirit. We are proud to strengthen our place in the international market and ensure that our brand is permanent in the long term.

O4. PROJECTS

O4. I. Epoxy Sheet

Epoxy floors, which are both durable and aesthetic, allow you to use them for an extended period without encountering problems. The use of epoxy material on floors also provides various decorative options. Epoxy floor coatings do not trap dirt on their surfaces and can be easily wiped and cleaned.

O4. 2. Pvc Floor Covering

PVC coatings, which come with extra surface protection for durability and easy maintenance conditions, offer creative solutions for commercial use and are particularly preferred in product groups designed for areas exposed to heavy traffic, such as schools and hospitals. They are easy to maintain, waterproof, antibacterial, and fire-resistant. Additionally, they are easy to apply and have a long lifespan.

O4. PROJECTS

O4. 3. Carpet Floor

Carpet flooring is generally produced in rolls or tiles and serves as a complete floor covering from wall to wall. These coverings offer many advantages, from sound insulation to walking comfort, and provide cleaner air by trapping dust particles. Modern carpet coverings are available in various colors, patterns, and textures, and are used in both residential and commercial spaces

O4. 4. Vinly Composite

Vinyl, even in areas with heavy foot traffic, is a high-performance material that can maintain its durability. The wear layer on the top provides protection against scratches, wear, and punctures. Vinyl floors offer a softer feel when walking, and the backing layer found in some vinyl products helps reduce fatigue and provide extra comfort. It provides sound insulation and is resistant to water.
